Yes this is Michael's group.

This is a comment on our proposal to withdraw the finding of inadequacy regarding Texas' provisions for emissions during start up/shut down and malfunction. Essentially we had found Texas SSM provisions were inadequate but we have reconsidered our position and are not proposing that the provisions are adequate under the Clean Air Act.

The comment period closed last Friday.

We received a number of comments and we are just starting evaluate the comments.

Hi Jeff,

We got an inquiry on a proposed TX SIP revision. I'm not positive which one it is; the reporter only sent this comment letter from the Environmental Protection Network. Is this still proposed or have we issued the final action yet?

Thanks,
 Jennah
